

Body Worn Camera Program

The High Bridge Borough Police Department is pleased to announce the implementation of the Watch Guard VISTA body worn camera system for officers. Maintaining the confidence of our community we serve is essential to effective and efficient delivery of policing services. Our continuing effort to promote transparency and accountability of law enforcement interactions with the public will be elevated through using this technology. The cameras are designed to memorialize police / citizen interactions from a first-person perspective capturing both video and audio. The cameras are utilized in accordance with Directive 2015-1, issued by the New Jersey Attorney General.

VISTA

The Simply Superior HD Wearable Camera

- Superior hardware quality
- Superior HiFi audio and HD video
- Record-After-the-Fact technology
- Simple to Use - Easy to Understand
- Ultra-reliable dock interface
- Integrates with 4RE in-car video

The **highest quality** body-worn camera on the market

The only camera that can guarantee you will **never miss an incident**

UNMATCHED HARDWARE QUALITY

HIGH QUALITY / ULTRA-RUGGED DESIGN
When you hold a VISTA camera in your hand, its quality is immediately apparent. It feels like a military-grade precision instrument.

DESIGNED FOR THE HARSH REALITIES OF LAW ENFORCEMENT

- Impact-absorbing rubber covers the camera's leading surfaces and lenses
- User controls are fully sealed and provide strong tactile feedback

THE 1ST WEARABLE CAMERA TO USE TRULY ROBUST MATERIALS

- Cast magnesium
- Polyurethane rubber
- Military-grade, ultra-hard resin
- Industrial-grade electronics (-40°F to +120°F)

PLASTIC, CONSUMER-GRADE CAMERAS FAIL TO HOLD UP IN THE LAW ENFORCEMENT ENVIRONMENT

ULTRA-RELIABLE DOCKING SYSTEM
Eliminates the most common failure point (cables and connectors)

Certified to MIL Spec standards (MIL-STD-810F)
Designed to Meet IP54 Waterproof and Drop Test Standards

SUPERIOR IMAGE QUALITY

720P HIGH DEFINITION

- Over 3X the resolution of the largest competitor
- 130° Wide angle field of view
- The lens turret can be rotated vertically 40° for optimal aiming from any mounting location
- Selectable resolution (H.264 High Profile compression)
 - 720p (1280 x 720)
 - 480p (854 x 480)

THERE'S MORE TO VIDEO THAN JUST RESOLUTION

VISTA's advanced image sensor takes two separate images for each frame of video - a dark exposure and a light exposure. The two images are blended together to create a perfectly exposed frame, which keeps bright areas from becoming over-exposed and dark areas from turning black. The result is the highest image quality of any body-worn video camera.

- Dramatically superior low light performance
- Ideal exposures even when facing direct sunlight
- Extremely rich colors at all light levels

ULTRA-WDR CAMERA TECHNOLOGY

Light Exposure Actual final VISTA image

Dark Exposure

SOMETIMES AUDIO IS MORE IMPORTANT THAN VIDEO

- 1st Police body camera to use high fidelity microphone technology
- Produces true CD audio quality

Silicon based audio sensor eliminates distortion from loud sources while still picking up soft spoken speech. Shock treated acoustic foam drummer blocks most wind noise.
